

Pumpfinder Plus®

PUMP SELECTION AND SIZING SOFTWARE

PumpfinderPlus® from Yeomans Chicago Corporation provides the latest in free, user-friendly pump selection and sizing software for your sewage, wastewater and solids-handling pump applications. Alternate versions are available for the company's Chicago Pump, Morris Pumps and Yeomans Pump product lines including conventional dry-pit, submersible, submersible dry-pit and suspended wet-pit pump types. Features include multiple comparative selections with thumbnail images, easy online web access and supporting documents, including specifications, installation drawings and general product information. Online system facilitates easy submission of quotation and engineering support requests.
